

20MM MK244 MOD 0 APDS

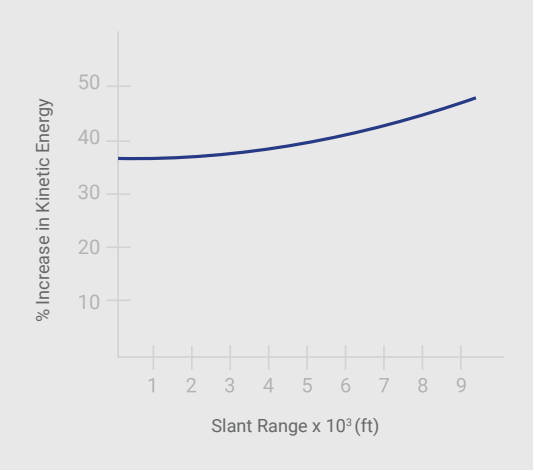

Enhanced Lethality Cartridge

MUNITIONS | **MEDIUM CALIBER**

The Mk244 has a 48% heavier penetrator. The increased penetrator mass coupled with improved ballistic efficiency produces higher kinetic energy on target.

OVERVIEW

General Dynamics Ordnance and Tactical Systems 20mm Enhanced Lethality Cartridge (ELC) with Compacted BALL POWDER® Propellant gives the MK15 Block 1B system full effectiveness against:

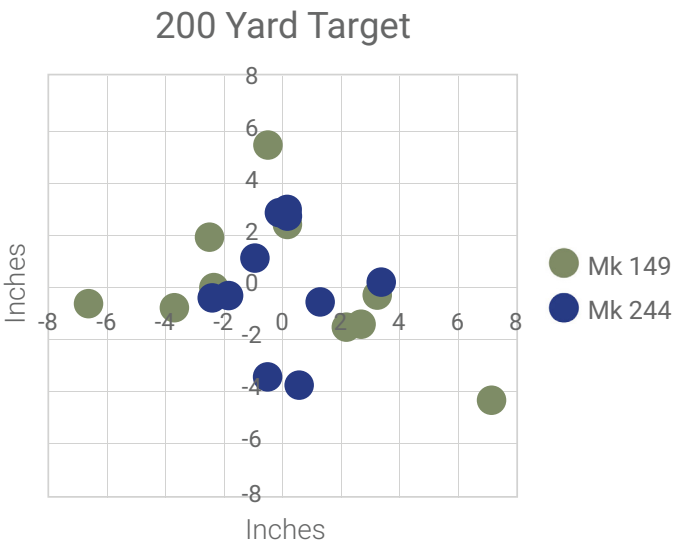

- Anti-Ship Missiles
- Helicopters
- Low Flying Planes

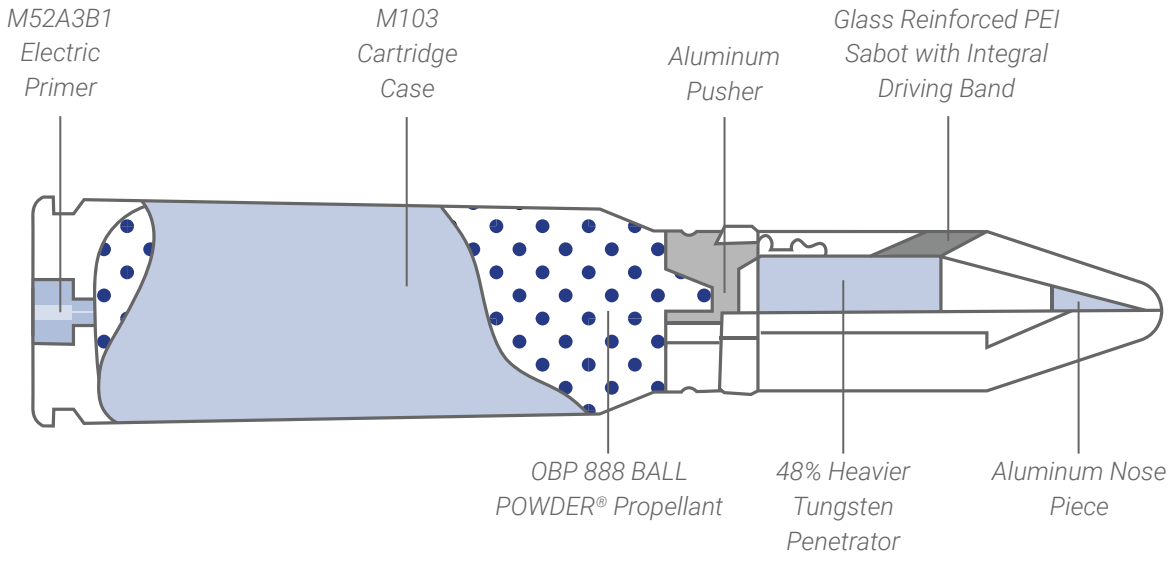

20MM MK244 MOD O APDS
Enhanced Lethality Cartridge

IMPROVEMENTS AS COMPARED WITH MK149

The Mk244 projectile dispersion is 40% less than Mk149. Producing lower Circular Error Probable (C.E.P.) with increased probability of hit.
