

120MM KE-W A4®

Armor-Piercing, Fin-Stabilized, Discarding Sabot-Tracer (APFSDS-T)

MUNITIONS | **LARGE CALIBER**

Tank Ammunition

The 120mm KE-W A4® Armor-Piercing, Fin Stabilized, Discarding-Sabot-Tracer (APFSDS-T) cartridge has been developed with the latest tungsten penetrator and propellant technologies that allow it to defeat modern conventional and advanced armor targets across a wide range of temperatures.

Produced by General Dynamics Ordnance and Tactical Systems along with Rheinmetall, the KE-W A4® has demonstrated its armor defeat capabilities while using a temperature insensitive propellant system to give this round an essentially flat temperature profile that allows its superior performance to occur at the most commonly encountered ambient operating temperatures.

This high performance cartridge will be safety certified by the U.S. Government to be fully qualified for the M1A1 and M1A2 (MBTs).
