

MUNITIONS

MEDIUM CALIBER

OVERVIEW

Inspired by the M1172 training round used by the U.S. Army, the 30mm x 173 TPDS-T Blue Wing sets a new standard for world-class training solutions, featuring a precise, cost-efficient steel core. Following years of rigorous development and testing, General Dynamics Ordnance and Tactical Systems has introduced the next generation of 30mm training ammunition—designed to offer industry-leading accuracy while keeping training costs low. For training excellence to reach the field, the ammunition must rise to the challenge, and the Blue Wing TPDS-T is expertly engineered to deliver.

TECHNICAL DATA

Criteria	GD1172
Muzzle Velocity (m/s)	1550
Ballistic Match to Hornet (mr at 2K)	1.0
Time of Flight to Hornet (sec at 2K)	0.5
Dispersion at 2,000 meters (mr) @21C	<.50
Tracer	>2km
